Jose Torres/R6/USEPA/US@EPA

Dear Mr. Jose Torres

I wonder what would be said if a terrorist poisoned Conroe, Texas's aquifer?

Conroe, Texas is a community of more than 50,000 people who depend on their drinking water from an aquifer.

It seems okay for Texcom to propose using an injection well that has a reasonable risk of poisoning 50,000 people in Conroe, Texas for making money.

I wonder if it would be consider negligent homicide if they receive their permit and 50,000 people got sick, and a few thousand died horribly from cancer kidney and liver failure because of Texcom was permitted to inject non-toxic anti-freeze and paint thinner into an injection well?

I wonder if the TEQC would be culpable in a conspiracy to negligently poison 50,000 people? Would RICO apply in this case?

I wonder if making a profit while poisoning people is different then terrorist doing it for political advantage?

The Texcom Proposal for using the old Humble oil field locations is fundamentally flawed. It endangers the drinking water of hundreds of thousands of people and threatens the property values of these Texas residences. Businesses that use these aquifers are also threatened. There is no substantial gain to the revenue base for local or state government.

Local and state government will have additional expenses due to and increase of 100 semis a day on local and state roads in this area. In addition toxic spill accidents on I 45 or local roads could cause substantial hardship to thousands of commuters and health risks. Local government revenue is decreased if property values fall if the ground water becomes contaminated. The few hundred of people who will benefit from this enterprise (a subsidiary of an out of state company) do not out weigh the health, safety, livelihoods, and property value lose in event of contamination of the aquifers. The risk is unjustified by financial gain and the proposed injection wells permits should be deigned with prejudice.

I hope you will express your opposition to this proposal to the TEQC.

Sincerely,
